The Yamaha RD500LC is a high-performance, two-stroke sports motorcycle, also known as the RZ500 in Canada and Australia. A lightened but detuned version known as the RZV500R was developed for the Japanese home market. Strict United States Environmental Protection Agency regulations meant that the RZ500 was not available for sale in that country. Produced for a short period between 1984 and 1986 it has become a sought after collector's machine.

The RD350 is a two-stroke motorcycle produced by Yamaha from 1973 to 1975. It evolved directly from the piston port (pre-reed valve intake tract), front drum-braked, five-speed Yamaha 350 cc "R5".

The engine is an air-cooled, parallel twin, six-speed (in some markets, such as the UK, the first model was sold in five-speed form), reed valve-equipped intake tract two-stroke engine. The bike is usually referred to as a sport bike.

All models were equipped with "Autolube" automatic oil injection, relieving the user from the need to mix gasoline and two-stroke oil.

Rim sizes are 18" WM2 (1.85") front and 18" WM3 (2.15") rear, both being of chromed, wire spoked steel construction. In the UK, rim sizes were 1.60 front and 1.85 rear.

The Nissan Z-series is a model series of sports cars manufactured by Nissan since 1969.

The original Z was first sold on October of 1969 in Japan as the Nissan Fairlady Z (Japanese: フェアレディZ, Hepburn: Nissan Fearedi Zetto) at Nissan Exhibition dealerships that previously sold the Nissan Bluebird. It was initially marketed as the Datsun 240Z for international customers. Since then, Nissan has manufactured seven generations of Z-cars, with the most recent—simply known as the Nissan Z—in production since 2022.

Main rival cars in the Japanese market included the Toyota Celica, Toyota Supra, Mitsubishi 3000GT and Mazda RX-7.

The earlier models of the Nissan Z were built at the Nissan Shatai plant in Hiratsuka until 2000, while the later models (350Z and 370Z) are built at Oppama (2002–2004) and...
