Professional technicians have relied on the Chilton Labor Guide estimated repair times for decades. This latest edition expands on that reliability by including technical hotline feedback and research from professional labor experts. The labor times reflect actual vehicle conditions found in the aftermarket, including rust, wear and grime. Available in both hardcover and CD-ROM, this completely revised manual provides thousands of labor times for 1981 through current year domestic and imported vehicles. All times reflect technicians' use of aftermarket tools and training.

Valiant Service Manual

This open access book explores the historical, cultural and philosophical contexts that have made anti-poverty the core of Chinese society since Liberation in 1949, and why poverty alleviation measures evolved from the simplistic aid of the 1950s to Xi Jinping's precision poverty alleviation and its goal of eliminating absolute poverty by 2020. The book also addresses the implications of China's experience for other developing nations tackling not only poverty but such issues as pandemics, rampant urbanization and desertification exacerbated by global warming. The first of three parts draws upon interviews of rural and urban Chinese from diverse backgrounds and local and national leaders. These interviews, conducted in even the remotest areas of the country, offer candid insights into the challenges that have forced China to continually evolve its programs to resolve even the most intractable cases of poverty. The second part explores the historic, cultural and philosophical roots of old China's meritocratic government and how its ancient Chinese ethics have led to modern Chinese socialism's stance that "poverty amidst plenty is immoral". Dr. Huang Chengwei, one of China's foremost anti-poverty experts, explains the challenges faced at each stage as China's anti-poverty measures evolved over 70 years to emphasize "enablement" over "aid" and to foster bottom-up initiative and entrepreneurialism, culminating in Xi Jinping's precision poverty alleviation. The book also addresses why national economic development alone cannot reduce poverty; poverty alleviation programs must be people-centered, with measurable and accountable practices that reach even to household level, which China has done with its "First Secretary" program. The third part explores the potential for adopting China's practices in other nations, including the potential for replicating China's successes in developing countries through such measures as the Belt and Road Initiative. This book also addresses prevalent misperceptions about China's growing global presence and why other developing nations must address historic, systemic causes of poverty and inequity before they can undertake sustainable poverty alleviation measures of their own.

Popular Science

In this fifth edition of *A Cognitive Psychology of Mass Communication*, author Richard Jackson Harris continues his examination of how our experiences with media affect the way we acquire knowledge about the world, and how this knowledge influences our attitudes and behavior. Presenting theories from psychology and communication along with reviews of the corresponding research, this text covers a wide variety of media and media issues, ranging from the commonly discussed topics – sex, violence, advertising – to lesser-studied topics, such as values, sports, and entertainment education. The fifth and fully updated edition offers: highly accessible and engaging writing contemporary references to all types of media familiar to students substantial discussion of theories and research, including interpretations of original research studies a balanced approach to covering the breadth and depth of the subject discussion of work from both psychology and media disciplines. The text is appropriate for Media Effects, Media & Society, and Psychology of Mass Media coursework, as it examines the effects of mass media on human cognitions, attitudes, and behaviors through empirical social science research; teaches students how to examine and evaluate mediated messages; and includes mass communication research, theory and analysis.
