SIGABA

in World War II]. Heise Online (in German). Retrieved March 26, 2019. CSP-1100 (C) Operating Instructions for ECM Mark 2 and CCM Mark 1, U.S.Department

In the history of cryptography, the ECM Mark II was a cipher machine used by the United States for message encryption from World War II until the 1950s. The machine was also known as the SIGABA or Converter M-134 by the Army, or CSP-888/889 by the Navy, and a modified Navy version was termed the CSP-2900.

Like many machines of the era it used an electromechanical system of rotors to encipher messages, but with a number of security improvements over previous designs. No successful cryptanalysis of the machine during its service lifetime is publicly known.

René Thury

station, which turned the two Thury 6-pole dynamos that each produce 1000 to 1100 volts at 45 amperes. In order to keep the same current, their speed varies

René Thury (7 August 1860 – 23 April 1938) was a Swiss pioneer in electrical engineering. He was known for his work with high voltage direct current electricity transmission and was known in the professional world as the "King of DC."

Timeline of Norwich

School established. 1100 – Bishop's Palace built (approximate date). 1101 – Norwich Cathedral dedicated. 1106 – Norwich fair active. 1100 – St. Leonard's

The following is a timeline of the history of the city of Norwich, Norfolk, England.

Western Electric

Shaw had partnered with Enos M. Barton in the former Western Union repair shop of Cleveland, to manufacture burglar alarms, fire alarms, and other electrical

Western Electric Co., Inc. was an American electrical engineering and manufacturing company that operated from 1869 to 1996. A subsidiary of the AT&T Corporation for most of its lifespan, Western Electric was the primary manufacturer, supplier, and purchasing agent for all telephone equipment for the Bell System from 1881 until 1984, when the Bell System was dismantled. Because the Bell System had a near-total monopoly over telephone service in the United States for much of the 20th century, Western Electric's equipment was widespread across the country. The company was responsible for many technological innovations, as well as developments in industrial management.

Economy car

resemblance to the Austin 1100. It was put into limited production by Fiat under their Autobianchi brand. Fiat still produced the FR layout 1100 of about the same

Economy car is a term mostly used in the United States for cars designed for low-cost purchase and operation. Typical economy cars are small (compact or subcompact), lightweight, and inexpensive to both produce and purchase. Stringent design constraints generally force economy car manufacturers to be inventive. Many innovations in automobile design were originally developed for economy cars, such as the Ford Model T and the Austin Mini.

Standard Motor Company

VI version, of which more than 1100 were made. 750 Airspeed Oxfords were also made as well as 20,000 Bristol Mercury VIII engines, and 3,000 Bristol

The Standard Motor Company Limited was a motor vehicle manufacturer, founded in Coventry, England, in 1903 by Reginald Walter Maudslay. For many years, it manufactured Ferguson TE20 tractors powered by its Vanguard engine. All Standard's tractor assets were sold to Massey Ferguson in 1959. Standard purchased Triumph in 1945 and in 1959 officially changed its name to Standard-Triumph International and began to put the Triumph brand name on all its

products. A new subsidiary took the name The Standard Motor Company Limited and took over the manufacture of the group's products.

The Standard name was last used in Britain in 1963, and in India in 1988.

Guizhou

east and latitudes 24°37' to 29°13' north. The average altitude is around 1100 meters. It borders Hunan to the east, Guangxi to the south, Yunnan to the

Guizhou is an inland province in Southwestern China. Its capital and largest city is Guiyang, in the center of the province. Guizhou borders the autonomous region of Guangxi to the south, Yunnan to the west, Sichuan to the northwest, the municipality of Chongqing to the north, and Hunan to the east. Guizhou has a humid subtropical climate. It covers a total area of 176,200 square kilometers and consists of six prefecture-level cities and three autonomous prefectures. The population of Guizhou stands at 38.5 million, ranking 18th among the provinces in China.

The Dian Kingdom, which inhabited the present-day area of Guizhou, was annexed by the Han dynasty in 106 BC. Guizhou was formally made a province in 1413 during the Ming dynasty. After the overthrow of the Qing in 1911 and following the...

Gas lighting

coal gas and, in limited cases, water gas. Early gas lights were ignited manually by lamplighters, although many later designs are self-igniting. Some urban

Gas lighting is the production of artificial light from combustion of a fuel gas such as natural gas, methane, propane, butane, acetylene, ethylene, hydrogen, carbon monoxide, or coal gas (sometimes called town gas). The light is produced either directly by the flame, generally by using special mixes (typically propane or butane) of illuminating gas to increase brightness, or indirectly with other components such as the gas mantle or the limelight, with the gas primarily functioning to heat the mantle or the lime to incandescence.

Before electricity became sufficiently widespread and economical to allow for general public use, gas lighting was prevalent for outdoor and indoor use in cities and suburbs where the infrastructure for distribution of gas was practical. At that time, the most common...

Land Rover series

"New model Land Rover is introduced Today", The Yorkshire Post and Leeds Mercury, Sept 21st 1955
"News". Motor. 17 February 1968. pp. 90-91. Road-Rail Vehicle

The Land Rover Series I, II, and III , or simply the Land-Rover (commonly referred to as Series Land Rovers, to distinguish them from later models) are compact British off-road vehicles, produced by the Rover Company since 1948, and later by British Leyland. Inspired by the World War II jeep, it was the first mass-produced civilian four-wheel drive car with doors, and an available hard roof. Contrary to conventional car and truck chassis, it used a sturdier fully box-welded frame. Furthermore, due to post-war steel shortage, and aluminium surplus, Land Rovers received non-rusting aluminium alloy bodies, favouring their longevity. In 1992, Land Rover claimed that 70% of all the vehicles they had built were still in use.

Most Series models feature leaf-spring suspension with selectable two or...

John Deere

agreed to allow farmers and independent repair shops to purchase access to John Deere software, manuals, and other information needed to fix John Deere

Deere & Company, doing business as John Deere (), is an American corporation that manufactures agricultural machinery, heavy equipment, forestry machinery, diesel engines, drivetrains (axles, transmissions, gearboxes) used in heavy equipment and lawn care equipment. It also provides financial services and other related activities.

Deere & Company is listed on the New York Stock Exchange under the symbol DE. The company's slogan is "Nothing Runs Like a Deere", and its logo is a leaping deer with the words "John Deere". It has used various logos incorporating a leaping deer for over 155 years. It is headquartered in Moline, Illinois.

It ranked No. 84 in the 2022 Fortune 500 list of the largest United States corporations. Its tractor series include D series, E series, Specialty Tractors, Super...
