Macroeconomics, 3rd Ed. [by] McTaggart, Findlay, Parkin

Everyone agrees that the only way to learn economics is to do it. Rote memorization does not work. The keys to success in economics are active involvement and working problems. To help students succeed, the Bade/Parkin package is designed to encourage learning by doing. After all, practice makes perfect! Practice is the cornerstone of the innovative Bade/Parkin approach. Each chapter of Foundations of Economics concentrates on a manageable number of core concepts. A full page Checkpoint containing a Practice Problem with solution and a parallel Exercise immediately follows each main idea. Checkpoints serve as stopping points and encourage students to practice using a concept before moving on. Different learning styles need different learning tools, and eFoundations, Bade/Parkin's extensive web environment, puts students in the

driver's seat and allows them to use technology in the way that suits them best.

Economics

Today's educational landscape requires practitioners to move from a teacher-centric to a more inclusive and student-centric approach. To address the diverse needs of students, educators must understand the challenges they face, and learn how to address them. This volume highlights the significance of diversity and inclusion practices in educational institutions.

Microeconomics, Global Edition

Parkin's Microeconomics is a worldwide leader because it provides a serious, analytical approach to the discipline using the latest policy and data. Parkin trains students to think like economists by offering a clear introduction to theory and applying the concepts to today's events, news, and research.

Foundations of Economics, Student Value Edition

This Global Edition has been edited to include enhancements making it more relevant to students outside the United States. Parkin brings critical issues to the forefront. Each chapter begins with one of today's key issues, and additional issues appear throughout the chapter to show the real-world applications of the theory being discussed. When the chapter concludes, students "read between the lines" to think critically about a news article relating to the issue, demonstrating how thinking like an economist can bring a clearer perspective to and deeper understanding of today's events. Students will begin to think about issues the way real economists do and learn how to explore difficult policy problems and make more informed decisions in their own economic lives.
