## Google Brain

*retract the paper was made by Megan Kacholia, vice president of Google Brain. As of April 2021, nearly 7000 current or former Google employees and industry supporters*

Google Brain was a deep learning artificial intelligence research team that served as the sole AI branch of Google before being incorporated under the newer umbrella of Google AI, a research division at Google dedicated to artificial intelligence. Formed in 2011, it combined open-ended machine learning research with information systems and large-scale computing resources. It created tools such as TensorFlow, which allow neural networks to be used by the public, and multiple internal AI research projects, and aimed to create research opportunities in machine learning and natural language processing. It was merged into former Google sister company DeepMind to form Google DeepMind in April 2023.

## Gemini (chatbot)

*and Google Gemini Are Both Doomed". Intelligencer. New York. Archived from the original on March 1, 2024. Cerullo, Megan (August 2, 2024). "Google's Gemini*

Gemini is a generative artificial intelligence chatbot developed by Google AI. Based on the large language model (LLM) of the same name, it was launched in February 2024. Its predecessor, Bard, was launched in March 2023 in response to the rise of OpenAI's ChatGPT agent and was based on the LaMDA and PaLM LLMs.

## History of self-driving cars

*2010. Retrieved 29 October 2014. John Markoff (October 9, 2010). "Google Cars Drive Themselves, in Traffic" The New York Times. Retrieved October 11*

Experiments have been conducted on self-driving cars since 1939; promising trials took place in the 1950s and work has proceeded since then. The first self-sufficient and truly autonomous cars appeared in the 1980s, with Carnegie Mellon University's Navlab and ALV projects in 1984 and Mercedes-Benz and Bundeswehr University Munich's Eureka Prometheus Project in 1987. In 1988, William L Kelley patented the first modern collision Predicting and Avoidance devices for Moving Vehicles. Then, numerous major companies and research organizations have developed working autonomous vehicles including Mercedes-Benz, General Motors, Continental Automotive Systems, Autoliv Inc., Bosch, Nissan, Toyota, Audi, Volvo, Vislab from University of Parma, Oxford University and Google. In July 2013, Vislab demonstrated...

## Tegra

*towards platforms that provide vehicular automation with the*

*applied "Nvidia Drive" brand name on reference boards and its semiconductors; and with the "Nvidia*

Tegra is a system on a chip (SoC) series developed by Nvidia for mobile devices such as smartphones, personal digital assistants, and mobile Internet devices. The Tegra integrates an ARM architecture central processing unit (CPU), graphics processing unit (GPU), northbridge, southbridge, and memory controller onto one package. Early Tegra SoCs are designed as efficient multimedia processors. The Tegra-line evolved to emphasize performance for gaming and machine learning applications without sacrificing power efficiency, before taking a drastic shift in direction towards platforms that provide vehicular automation with the applied "Nvidia Drive" brand name on reference boards and its semiconductors; and with the "Nvidia Jetson" brand name for boards adequate for AI applications within e.g. robots...

Betty Draper

*1963. Betty has a brother, William (Eric Ladin), who is married to Judy (Megan Henning) and whose daughters Don and Betty consider to be "rowdy." Betty's*

Elizabeth "Betty" Draper Francis (formerly Draper, née Hofstadt) is a fictional character played by January Jones on AMC's television series *Mad Men*. She begins the show married to protagonist Don Draper (Jon Hamm); following a separation in the third season, the two remain divorced for the remainder of the series, but continue to share custody of their three children.

Blonde, beautiful, emotionally distant and immature, Betty spends the bulk of *Mad Men* slowly growing as a person amid the social and political turmoil of the 1960s. The character's appearance is often compared to that of Grace Kelly, with the similarities between the two also drawn during the first season of the series.

Jones received two Golden Globe nominations and a Primetime Emmy Award nomination for her performance. She...

United States v. Valenzuela-Bernal

*450 F.2d 1 (9th Cir. 1971). "Immigration and Nationality Act"; Healy, Megan A. "Compulsory Process and the War on Terror: A Proposed Framework" (PDF)*

*United States v. Valenzuela-Bernal*, 458 U.S. 858 (1982), is a United States Supreme Court case that determined the constitutionality of deporting aliens who might give testimony in criminal alien smuggling prosecutions. Because deporting alien witnesses might take away a testimony that would be both "material and favorable" to the defendant, it gives rise to a potential motion from the defense to dismiss the indictment under the Compulsory Process Clause of the Sixth Amendment and the Due Process Clause of the Fifth Amendment.

The Supreme Court held that because the defendant failed to make a "plausible suggestion that the deported aliens possessed any material evidence that was not merely cumulative of other evidence," the District Court properly denied the respondent's motion to dismiss the...

## Pokémon Go

*their Google accounts, thereby allowing the app to &quot;access players&#039; Gmail-based email, Google Drive-based files, photos and videos stored in Google Photos*

Pokémon Go (stylized as Pokémon GO) is a 2016 augmented reality (AR) mobile game originally developed and published by Niantic in collaboration with Nintendo and The Pokémon Company for iOS and Android devices. It uses mobile devices with GPS to locate, capture, train, and battle virtual Pokémon, which appear as if they are in the player's real-world location. The game is free-to-play; it uses a freemium business model combined with local advertising and supports online purchases for additional in-game items as well as virtual and real-world events. The game launched with around 150 species of Pokémon, with several hundred more species being added as of 2025.

Pokémon Go was released to mixed reviews; critics praised the concept but criticized technical problems. It was one of the most used...

## Joan Collins

*The National (Scotland). 21 November 2023. Retrieved 4 May 2025. McCarty, Megan (16 January 2024). &quot;Who Is Joan Collins&#039; Husband? All About Percy Gibson&quot;*

Dame Joan Henrietta Collins (born 23 May 1933) is an English actress, author and columnist. She is the recipient of several

accolades, including a Golden Globe Award, a People's Choice Award, two Soap Opera Digest Awards and a Primetime Emmy Award nomination. In 1983, Collins was awarded a star on the Hollywood Walk of Fame. She has been recognised for her philanthropy, particularly her advocacy towards causes relating to children, which has earned her many honours. In 2015, she was made a Dame by Queen Elizabeth II for her charitable services, presented to her by the Prince of Wales.

Collins trained as an actress at the Royal Academy of Dramatic Art. She signed to The Rank Organisation at the age of 17 and had small roles in the British films *Lady Godiva Rides Again* (1951) and *The Woman's...*

Confederate monuments and memorials

*Drive Forest Hills: Robert E. Lee Drive Franklin: General J.B. Hood Drive General Nathan Bedford Forrest Drive Jeb Stuart Drive Jefferson Davis Drive*

Confederate monuments and memorials in the United States include public displays and symbols of the Confederate States of America (CSA), Confederate leaders, or Confederate soldiers of the American Civil War. Many monuments and memorials have been or will be removed under great controversy. Part of the commemoration of the American Civil War, these symbols include monuments and statues, flags, holidays and other observances, and the names of schools, roads, parks, bridges, buildings, counties, cities, lakes, dams, military bases, and other public structures. In a December 2018 special report, *Smithsonian Magazine* stated, "over the past ten years,

taxpayers have directed at least \$40 million to Confederate monuments—statues, homes, parks, museums, libraries, and cemeteries—and to Confederate...

Assured clear distance ahead

*Supple, a Google safety driver during a recent test drive on the streets near Google's Silicon Valley headquarters. ...the technology, like Google's car, drives*

In legal terminology, the assured clear distance ahead (ACDA) is the distance ahead of any terrestrial locomotive device such as a land vehicle, typically an automobile, or watercraft, within which they should be able to bring the device to a halt. It is one of the most fundamental principles governing ordinary care and the duty of care for all methods of conveyance, and is frequently used to determine if a driver is in proper control and is a nearly universally implicit consideration in vehicular accident liability. The rule is a precautionary trivial burden required to avert the great probable gravity of precious life loss and momentous damage. Satisfying the ACDA rule is necessary but not sufficient to comply with the more generalized basic speed law, and accordingly, it may be used as both...
