Holden Monaro

The 550 bhp (410 kW) Monaro (which Beechey and his chief mechanic Pat Purcell had bored out from 5.7 to 6.0 litres) proved too much for the opposition

The Holden Monaro (Mon-AH-ro) is a car that was manufactured by General Motors' Australian division Holden. It has a front-engine, rear-wheel-drive layout and was produced with a two-door coupé body from 1968 to 1976 and again from 2001 to 2006 and with a 4-door sedan body from 1973 to 1979.

Three generations of the Monaro coupe have been produced, the first covering the HK, HT, and HG series from 1968 to 1971, the second covering the HQ, HJ, HX, and HJ series from 1971 to 1979, and the third covering the VX, VY, and VZ series from 2001 to 2006.

The first generation Monaro coupe was also manufactured by General Motors South Africa from 1970 to 1973, utilising CKD kits imported from Australia.

The third generation Monaro coupe was manufactured not only for domestic Australian consumption but...

Arcangelo Corelli

by Bassani was contained in a poem published in 1693 dedicated to Henry Purcell and then picked up by both Burney and his rival, Sir John Hawkins. Previously

Arcangelo Corelli (, also UK: , US: ; Italian: [ar'kandʒelo ko'relli]; 17 February 1653 – 8 January 1713) was an Italian composer, musician, and violinist of the middle Baroque era. His music was key in the development of the modern genres of Sonata and Concerto, in establishing the preeminence of the violin, and as the first coalescing of modern tonality and functional harmony.

He was trained in Bologna and Rome and spent most of his career there with the protection of wealthy patrons. Though his entire production is limited to just six published collections – five of which are trio sonatas or solo and one of concerti grossi — he achieved great fame and success throughout Europe, in the process crystallizing widely influential musical models.

His writing was admired for its balance, refinement...

Glossary of engineering: A-L

respect to a universal reference system (without any additional metal-solution interface). Absolute pressure is zero-referenced against a perfect vacuum

This glossary of engineering terms is a list of definitions about the major concepts of engineering. Please see the bottom of the page for glossaries of specific fields of engineering.

Anxiety

PMID 35677145. Archived (PDF) from the original on 2022-10-09. Rice SM, Purcell R, De Silva S, Mawren D, McGorry PD, Parker AG (September 2016). "The Mental

Anxiety is an emotion characterised by an unpleasant state of inner turmoil and includes feelings of dread over anticipated events. Anxiety is different from fear in that fear is defined as the emotional response to a present threat, whereas anxiety is the anticipation of a future one. It is often accompanied by nervous behavior such as pacing back and forth, somatic complaints, and rumination.

Anxiety is a feeling of uneasiness and worry, usually generalized and unfocused as an overreaction to a situation that is only subjectively seen as menacing. It is often accompanied by muscular tension, restlessness, fatigue, inability to catch one's breath, tightness in the abdominal region, nausea, and problems in concentration. Anxiety is closely related to fear, which is a response to a real or perceived...

Recorder (musical instrument)

Composers who have written for the recorder include Monteverdi, Lully, Purcell, Handel, Vivaldi, Telemann, Bach, Hindemith, and

Berio. There are many

The recorder is a family of woodwind musical instruments and a member of the family of duct flutes that includes tin whistles and flageolets. It is the most prominent duct flute in the western classical tradition. A recorder can be distinguished from other duct flutes by the presence of a thumb-hole for the upper hand and holes for seven fingers: three for the upper hand and four for the lower.

Recorders are made in various sizes and ranges, the sizes most commonly in use today are: the soprano (also known as descant, lowest note C5), alto (also known as treble, lowest note F4), tenor (lowest note C4), and bass (lowest note F3). Recorders were traditionally constructed from wood or ivory. Modern professional instruments are wooden, often boxwood; student and scholastic recorders are commonly...

Attention deficit hyperactivity disorder

1469-7610.2011.02467.x. PMID 21923806. Lee SH, Ripke S, Neale BM, Faraone SV, Purcell SM, Perlis RH, et al. (September 2013). "Genetic relationship between five

Attention deficit hyperactivity disorder (ADHD) is a neurodevelopmental disorder characterised by symptoms of inattention, hyperactivity, impulsivity, and emotional dysregulation that are excessive and pervasive, impairing in multiple contexts, and developmentally inappropriate. ADHD symptoms arise from executive dysfunction.

Impairments resulting from deficits in self-regulation such as time management, inhibition, task initiation, and sustained attention can include poor professional performance, relationship difficulties, and numerous health risks, collectively predisposing to a diminished quality of life and a reduction in life expectancy. As a consequence, the disorder costs society hundreds of billions of US dollars each year, worldwide. It is associated with other mental disorders as...

United States corporate law

Review 349 'The Unions Step on Board' (October 27, 1993) Financial Times PJ Purcell, 'The Enron Bankruptcy and Employer Stock in Retirement Plans' (March 11

United States corporate law regulates the governance, finance and power of corporations in US law. Every state and territory has its own basic corporate code, while federal law creates minimum standards for trade in company shares and governance rights, found mostly in the Securities Act of 1933 and the Securities and Exchange Act of 1934, as amended by laws like the Sarbanes-Oxley Act of 2002 and the Dodd-Frank Wall Street Reform and Consumer Protection Act. The US Constitution was interpreted by the US Supreme Court to allow corporations to incorporate in the state of their choice, regardless of where their headquarters are. Over the 20th century, most major corporations incorporated under the Delaware General Corporation Law, which offered lower corporate taxes, fewer shareholder rights...

List of Harvard University people

Peace Prize 2009 ". Nobel Foundation. Retrieved January 30, 2011. "Dr. E.M. Purcell, 84, Shared Nobel for Work on Hydrogen". Almaz.com. March 10, 1997. Retrieved

The list of Harvard University alumni includes notable graduates, professors, and administrators affiliated with Harvard University. For a list of notable non-graduates of Harvard, see the list of Harvard University non-graduate alumni. For a list of Harvard's presidents, see President of Harvard University.

Eight Presidents of the United States have graduated from Harvard University: John Adams, John Quincy Adams, Rutherford B. Hayes, John F. Kennedy, Franklin Delano Roosevelt, Theodore Roosevelt, George W. Bush, and Barack Obama. Bush graduated from Harvard Business School, Hayes and Obama from Harvard Law School, and the others from Harvard College.

Over 150 Nobel Prize winners have been associated with the university as alumni, researchers or faculty.

Agriculture in California

Heliochara delta, *Pagaronia tredecimpunctata*, and *Philaenus spumarius*. Purcell & Saunders 1999 find infections in plants common to riparian zones [here](#)

Agriculture is a significant sector in California's economy, producing nearly US\$50 billion in revenue in 2018. There are more than 400 commodity crops grown across California, including a significant portion of all fruits, vegetables, and nuts in the United States. In 2017, there were 77,100 unique farms and ranches in the state, operating across 25.3 million acres (10,200,000 hectares) of land.

The average farm size was 328 acres (133 ha), significantly less than the average farm size in the U.S. of 444 acres (180 ha).

Because of its scale, and the naturally arid climate, the agricultural sector uses about 40 percent of California's water consumption. The agricultural sector is also connected to other negative environmental and health impacts, including being one of the principal sources...

2013 in science

February 2013. Carretti, E; Crocker, RM; Staveley-Smith, L; Haverkorn, M; Purcell, C; Gaensler, BM; Bernardi, G; Kesteven, MJ; Poppi, S (3 January 2013)

A number of significant scientific events occurred in 2013, including the discovery of numerous Earthlike exoplanets, the development of viable lab-grown ears, teeth, livers and blood vessels, and the atmospheric entry of the most destructive meteor since 1908. The year also saw successful new treatments for diseases such as HIV, Usher syndrome and leukodystrophy, and a major expansion in the use and capabilities of technologies such as 3D printing and autonomous cars.

The United Nations designated 2013 the International Year of Water Cooperation.
