Introduction to Mobile App Architecture

Defining your desired result: What kind of app are you building?

Understanding your target audience and platform compatibility

Deciding whether your app is consumer-facing or business-facing

Evaluating self-contained vs service-driven app approaches

Understanding the iOS vs Android platform differences and market share

Choosing the right stack for your app: Native, cross-platform, or hybrid

Understanding business logic: Where should your data live?

UX/UI design considerations for mobile apps

Security, testing, and preparing for launch

Decision tree for picking the right approach based on your app's needs

Parting advice: Build thoughtfully and plan for mistakes
