Stock Fitter's Bible was written for one purpose, to help clay target shooters improve their scores. As you read you will understand why the book has received so many rave reviews. Coaches and trainers teach specific gun mounts, stances and body postures (shooting forms). To shoot up to your full potential, you must use a correct form. To do that, your gun must have stock dimensions that allow someone of your individual size and shape to use the form. If your gun doesn't fit you, a correct form cannot be used - it's that simple. To help you shoot better, the book explains step by step, how your gun can be made to fit you. When it fits, you can expect smoother, more accurate swings, higher, more consistent scores and reduced felt recoil. It also explains how to see targets better, how to effectively visualize targets before calling for them, ways to reduce stress and to postpone fatigue. Almost anyone can improve their shooting. Stock Fitter's Bible explains how to do it.
