The Navistar DT (Diesel Turbocharged or Diesel Turbo) engine family is a line of mid-range inline-6 diesel engines. With

horsepower ratings ranging from 170 hp (130 kW) to 350 hp (260 kW), the Navistar DT engines are used primarily in medium-duty truck and bus applications such as school buses, although some versions have been developed for heavy-duty regional-haul and severe-service applications.

Prior to 1986, Navistar International, then known as International Harvester Company, used the DT engine in farm and construction equipment.

From 1997 to 2004, the DT was also rebadged and sold by Detroit Diesel as the Series 40.

Power-to-weight ratio

Power-to-weight ratio (PWR, also called specific power, or power-to-mass ratio) is a calculation commonly applied to engines and mobile power sources to enable the comparison of one unit or design to another. Power-to-weight ratio is a measurement of actual performance of any engine or power source. It is also used as a measurement of performance of a vehicle as a whole, with the engine's power output being divided by the weight (or mass) of the vehicle, to give a metric that is independent of the vehicle's size. Power-to-weight is often quoted by manufacturers at the peak value, but the actual value may vary in use and variations will affect performance.

The inverse of power-to-weight, weight-to-power ratio (power loading) is a calculation commonly applied to aircraft, cars, and vehicles in...

fuel injection, and raising the compression ratio, to boost horsepower and torque. In front, the original 38 mm diameter fork tubes were enlarged to 41 mm

The Yamaha TMAX (or T-Max) series of maxi-scooters has been manufactured by Yamaha Motor Company for the European market since its debut at July 2000 press events in Naples, Italy and Iwata, Japan, combining motorcycle performance with the convenience and flexibility for commuting of a scooter.

When it was introduced, the 500cc TMAX engine was the largest (and most powerful) ever used in a production scooter. Yamaha enlarged the engine to 530cc for 2012 and subsequent models. The most recent TMAX redesign, with the model designation XP530, is for the 2017 model year. This model includes D-Mode which lets the rider select a sportier engine running mode for more thrilling performance. Yamaha used the designation XP500 for all previous model years; more than 233,000 TMAX scooters have been sold...
