The History of Spiritualism

Publisher Description

Portuguese

Twelve-year-old villain, Artemis Fowl, is the most ingenious criminal mastermind in history. His bold and daring plan is to hold a leprechaun to ransom. But he's taking on more than he bargained for when he kidnaps Captain Holly Short of the LEPrecon (Lower Elements Police Reconnaissance Unit). For a start, leprechaun technology is more advanced than our own. Add to that the fact that Holly is a true heroine and that her senior officer Commander Root will stop at nothing to get her back and you've got the mother of all sieges brewing!

Artemis Fowl

Gout has been seen as a disease afflicting upper-class males of superior wit, genius and creativity. It is also believed to protect its sufferers and assure long life. This study investigates the history of gout and offers a perspective on medical and social history, sex, prejudice and class.

Gout

This volume brings together a selection of papers presented at an international conference on Translation Studies in Barcelona in 1998. The papers illustrate four areas that are of particular interest in translation research today in Europe, Asia and Latin America. The purpose of the first section, 'Investigating Translation Paradigms', is to reach a critical revision of existing paradigms and to develop new ones in approaching the translated text. The second section, 'Investigating the Translation Process', focuses on the skills, knowledge and strategies that make up translation competence. The third section, 'Investigating Translation and Ideology' addresses not only the 'invisible' influence of ideologies on the translator, but also the role of translators in transmitting ideology. The fourth section, 'Investigating Translation Receivers' envisages

translators as communicators caught between the opposing trends of localisation and globalisation. This tension can be seen in the selection of the papers, some of which reflect on research carried out in recently established translation centres in Spain, while others discuss the latest work of scholars from long established centres in other countries.

Investigating Translation

Based on the bestselling book, *Rivers of North America*, this new guide stands as the only primary source of complete and comparative baseline data on the biological and hydrological characteristics of more than 180 of the highest profile rivers in Europe. With numerous full-color photographs and maps, *Rivers of Europe* includes conservation information on current patterns of river use and the extent to which human society has exploited and impacted them. *Rivers of Europe* provides the information ecologists and conservation managers need to better assess their management and meet the EU legislative good governance targets. Coverage on more than 180 European rivers Summarizes biological, ecological and biodiversity characteristics Provides conservation managers with information to resolve conflicts between recreational use of rivers, their use as a water supply, and the need to conserve natural

habitats Data on river hydrology (maximum , minimum and average flow rates), seasonal variation in water flow Numerous full-color photographs Information on the underlying geology and its affect on river behaviour

The Highlands of the Brazil

Elegantly written by a distinguished culinary historian, Food Is Culture explores the innovative premise that everything having to do with food--its capture, cultivation, preparation, and consumption--represents a cultural act. Even the \"choices\" made by primitive hunters and gatherers were determined by a culture of economics (availability) and medicine (digestibility and nutrition) that led to the development of specific social structures and traditions. Massimo Montanari begins with the \"invention\" of cooking which allowed humans to transform natural, edible objects into cuisine. Cooking led to the creation of the kitchen, the adaptation of raw materials into utensils, and the birth of written and oral guidelines to formalize cooking techniques like roasting, broiling, and frying. The transmission of recipes allowed food to acquire its own language and grow into a complex cultural product shaped by climate, geography, the pursuit of pleasure, and later, the desire for health. In his history, Montanari touches on the spice trade, the first

agrarian societies, Renaissance dishes that synthesized different tastes, and the analytical attitude of the Enlightenment, which insisted on the separation of flavors. Brilliantly researched and analyzed, he shows how food, once a practical necessity, evolved into an indicator of social standing and religious and political identity. Whether he is musing on the origins of the fork, the symbolic power of meat, cultural attitudes toward hot and cold foods, the connection between cuisine and class, the symbolic significance of certain foods, or the economical consequences of religious holidays, Montanari's concise yet intellectually rich reflections add another dimension to the history of human civilization. Entertaining and surprising, *Food Is Culture* is a fascinating look at how food is the ultimate embodiment of our continuing attempts to tame, transform, and reinterpret nature.

Rivers of Europe

Written to highlight the Catholic Church's central role in shaping Western Civilization, this book shows how the Church gave birth to modern science, international law, the free market economy, and much, much more.

Stationary Fire Pumps Handbook

The Ecology of Building Materials explores key questions surrounding sustainability of building materials. It provides technical data to enable design and building professionals to choose the most appropriate materials for a project: those that are least polluting, most energy efficient, and from sustainable sources. The book also gives information and guidance on a wide range of issues such as recycling, detailing for increased durability and Life Cycle Analysis. Berge's book, translated from the Norwegian by Chris Butters and Filip Henley, offers safe and environmentally friendly material options. It provides an essential and easy-to-use reference guide to this complex subject for the building industry professional. New to this edition:

- Thorough exploration of building materials in relation to climate change issues
- Extensive updating of basic data, as well as the introduction of a wide range of new materials
- Methods for recycling and reuse of materials
- More information on the interaction between materials and the indoor environment, ventilation and energy use
- Full colour text and user-friendly larger format

Bjørn Berge is a practicing architect, researcher and lecturer. Since the 1970s, he has written several books on building ecology for the Scandinavian public. He is one of the founders of Gaia Architects who have developed a wide range of

pioneering techniques in sustainable building.

A History and Description of Modern Wines

Rivers differ among themselves and through time. An individual river can vary significantly downstream, changing its dimensions and pattern dramatically over a short distance. If hydrology and hydraulics were the primary controls on the morphology and behaviour of large rivers, we would expect long reaches of rivers to maintain characteristic and relatively uniform morphologies. In fact, this is not the case - the variability of large rivers indicates that other important factors are involved. River Variability and Complexity presents an interesting approach to the understanding of river variability. It provides examples of river variability and explains the reasons for them, including fluvial response to human activities. Understanding the mechanisms of variability is important for geomorphologists, geologists, river engineers and sedimentologists as they attempt to interpret ancient fluvial deposits or anticipate river behaviour at different locations and through time. This book provides an excellent background for graduates, researchers and professionals.

Food is Culture

Modern Advances in Tourism Research provides a thorough assessment of state-of-the-art academic research in this field of economic science. The authors start by scoping the scene of tourism research. They progress to a comprehensive analysis of themes of particular interest for researchers and academics interested in the workings of the tourism markets, such as new analysis frameworks in tourism economics and new operational tools in tourism research.

Facts about Port and Madeira

This mysterious, poetic and often amusing collection of myths illustrates the religion and thought of the West African Yoruba People.

How the Catholic Church Built Western Civilization

Andre Leu challenges conventional farming methods by refuting the myths that surround the use and understanding of pesticides. He exposes the dangers of these chemicals and advocates organic practices as

the most viable for farming in the 21st Century.

The Ecology of Building Materials

"A seriously eye opening, inspiring and thought-provoking book!" - Nathan Outlaw "This is not a cook book but a true source of knowledge and inspiration." - Zero Waste Europe "I've always said that it's in a chef's DNA to utilize what would otherwise be thrown away. We are hardwired to take the uncoveted and make it delicious. But Doug McMaster is on another level entirely—he is doing some of the most thorough and thoughtful work on food waste today. This book gives you more than a glimpse into his mind. It provides a much needed roadmap for a future of limited resources and growing demands." - Dan Barber, Chef/Co-owner of Blue Hill and Blue Hill at Stone Barns Silo maps out an extraordinary new plan from radical young chef Douglas McMaster, founder of SILO the first zero food-waste restaurant—a food system for the future. He's a man on a mission—dedicated to weaning us from our entrenched and over-processed food habits, encouraging us to go for the purest, most natural and efficient way to cook and eat, committed to de-industrializing our food system so that we eat fresh, waste less and make the most of what nature gives us. "Closed-loop systems," "radical suppliers," "off-

grid ingredients," "waste-free prep" and "clean farming" are just some of the words you will find in this polemic on the future of food as we know it. These are just some of the raw ingredients deftly chopped and mixed into an irresistible and intoxicating fusion. Part inspiration, part practical kitchen know-how, part philosophy—just add anarchic flavours and a dash of pure hope for a beautifully crafted book destined to be a refreshingly radical addition to your kitchen library.

River Variability and Complexity

In Edgar Allan Poe's "Ligeia," the narrator recounts his intense love for the intelligent and beautiful Ligeia. After her mysterious death, he remarries, but Ligeia's presence haunts him, leading to a chilling climax that explores themes of love, death, and the supernatural.

Advances in Modern Tourism Research

The selection of the proper materials for a structural component is a critical activity that is governed by many, often conflicting factors. Incorporating materials expert systems into CAD/CAM operations could assist designers by suggesting potential manufacturing processes for particular products to facilitate concurrent engineering, recommending

various materials for a specific part based on a given set of characteristics, or proposing possible modifications of a design if suitable materials for a particular part do not exist. This book reviews the structural design process, determines the elements, and capabilities required for a materials selection expert system to assist design engineers, and recommends the areas of expert system and materials modeling research and development required to devise a materials-specific design system.

Portuguese Rule on the Gold Coast, 1469-1682

For the past three decades, we have been steadily creating an extreme 'time-crunch economy' that has affected jobs, portfolios, businesses and lives. But the 'time-crunch economy' is turning into 'the leisure economy' and it will mean wrenching adjustments for our lives and institutions. Everyone from consumers, investors, businesses, and policy-makers will need to understand the changes afoot. The Leisure Economy posits profound economic changes in North America due to both the retirement of the baby boomers and the attitudes of ascendant generations X and Y. Looking at trends in demographics, economics and generational change, this book looks at how to stay ahead of the leisure economy and predicts who will be

the winners and losers in the seismic shift ahead.

Yoruba Myths

The Lost Colony of the Confederacy is the story of a grim, quixotic journey of twenty thousand Confederates to Brazil at the end of the American Civil War. Although it is not known how many Confederates migrated to South America-estimates range from eight thousand to forty thousand-their departure was fueled by bitterness over a lost cause and a distaste for an oppressive victor. Encouraged by Emperor Dom Pedro, most of these exiles settled in Brazil. Although at the time of the Civil War the exodus was widely known and discussed as an indicator of the resentment against the Northern invaders and strict governmental measures, *The Lost Colony of the Confederacy* is the first book to focus on this mass migration. Eugene Harter vividly describes the lives of these last Confederates who founded their own city and were called Os Confederados. They retained much of their Southernness and lent an American flavor to Brazilian culture. First published in 1985, this work details the background of the exodus and describes the life of the twentieth-century descendants, who have a strong link both to Southern history and to modern Brazil. The fires have cooled, but it is useful to understand the intense feelings that sparked the migration to Brazil.

Southern ways have melded into Brazilian, and both are linked by the unbreakable bonds of history, as shown in this revealing account. The late EUGENE C. HARTER retired from the U.S. Senior Foreign Service and lived in Chestertown, Maryland, until his death in 2010. He was the grandson and greatgrandson of Confederates who left Texas and Mississippi as a part of the great Confederate migration in the late 1860s. Harter is buried at Arlington National Cemetery.

The Myths of Safe Pesticides

With the cooperation of many of Jacques Cousteau's collaborators, friends, and family, Matsen provides the first full picture of the remarkable life of the world's most renowned oceanographer.

Silo

"There are many books viewing the world through the eyes of politicians. This is an exciting book that views nineteenth-century America through the eyes of one of its most important publishers, George Palmer Putnam. Putnam's publisher's eyes are amazing lenses because of his total involvement and patronage of the leading authors of his time. He toiled to give their voices greater exposure to the world". -- Patricia

Schroeder, President & CEO, Association of American Publishers Inc.

Ligeia

The book \"Grapes and Wines: Advances in Production, Processing, Analysis, and Valorization\" intends to provide to the reader a comprehensive overview of the current state-of-the-art and different perspectives regarding the most recent knowledge related to grape and wine production. Thus, this book is composed of three different general sections: (1) Viticulture and Environmental Conditions, (2) Wine Production and Characterization, and (3) Economic Analysis and Valorization of Wine Products. Inside these 3 general sections, 16 different chapters provide current research on different topics of recent advances on production, processing, analysis, and valorization of grapes and wines. All chapters are written by a group of international researchers, in order to provide up-to-date reviews, overviews, and summaries of current research on the different dimensions of grape and wine production. This book is not only intended for technicians actively engaged in the field but also for students attending technical schools and/or universities and other professionals that might be interested in reading and learning about some

fascinating areas of grape and wine research.

Computer-Aided Materials Selection During Structural Design

A Nobel Laureate offers impressions of the development of modern physics, emphasizing complex but less familiar personalities. Offers fascinating scientific background and compelling treatments of topics of current interest. 1980 edition.

Sketches of Society and Manners in Portugal

Fresh, accessible, and gorgeous, this bestselling guide has been updated with the latest information on wines in a visually stunning format. 30,000print.

Miscellanea Curiosa

Pioneers in dictionary publishing for over 175 years, Collins are now proud to offer the Concise English Dictionary in print and online. The eighth edition of the groundbreaking Collins Concise Dictionary is the only dictionary in concise format with encyclopedic entries

for people, places, and regions. Ideal for families and students, this is essential for anyone who needs a dictionary that supports research in all areas (academic subjects as well as hobbies, sport and recreation) and study. Have confidence - comprehensive and authoritative, with all the words and definitions you need Get it right - language notes help you choose the right words for every situation and give advice on words that are changing in meaning or use. Get there fast - clear layout with colour. Find out more - thousands of entries for people and places.

The Leisure Economy

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of

keeping this knowledge alive and relevant.

The Lost Colony of the Confederacy

A collection of Ginsberg's poems include meditations, songs, soliloquies, fantasies, elegies, and regional portraits of America.

Jacques Cousteau

A prize-winning murder mystery novel in which two boy detectives solve a crime in 1960s Brazil—a coming of age tale reminiscent of Niccolò Ammaniti's *I'm Not Scared*, *Stand By Me*, and *To Kill a Mockingbird*. If I close my eyes now, I can still feel her blood on my fingers. If only I had closed my eyes then, or kept my mouth shut, not told anyone about our discovery by the swimming hole, we could have gone back to dreaming about spaceships. A horrifying discovery by two young boys while playing in a mango plantation marks the end of their childhood. As they finally open their eyes to the adult world, they see a place where storybook heroes don't exist, but villains and lies do. A bestseller in Brazil, this nostalgic murder mystery evokes the special nature of childhood friendships while painting a picture of a fascinating country.

George Palmer Putnam

"The present UNWTO study provides the first comprehensive baseline research of the Organization on the links between tourism and intangible cultural heritage (ICH). Besides exploring major challenges, risks and opportunities for tourism development related to ICH, it further discusses practical steps for the elaboration, management and marketing of intangible cultural heritage-based tourism products."

Foreword.

Grapes and Wines

Anaerobic digestion (AD) is a biological process that happens naturally when bacteria breaks down organic matter in environments with little or no oxygen. It is effectively a controlled and enclosed version of the anaerobic breakdown of organic waste in landfills which release methane. In this book, the authors present current research in the study of the processes, products and application of anaerobic activity. Topics discussed include the anaerobic treatment of wastewater; a scientific review of the agronomic, environmental and social benefits of anaerobic digestion and the microbial aspects of anaerobic digestion for biogas production.
