### *equivalent*

Microsoft Office 97 (version 8.0) is the fifth major release for Windows of Microsoft Office, released by Microsoft on November 19, 1996. A Mac OS equivalent, Microsoft Office 98 Macintosh Edition, was released on January 6, 1998. Microsoft Office 97 became a major milestone release for introducing new features and improvements over its predecessor Microsoft Office 95.

The suite is officially compatible with Windows NT 3.51 SP5 through Windows Me. It is the last version of Microsoft Office to support Windows NT 3.51 SP5 and Windows NT 4.0 RTM-SP2. Two Service Releases (SR-1 and SR-2) have been released for Office 97; SR-2 solves the year 2000 problem in Office 97. Hotfix support for Office 97 ended on February 28, 2002, while assisted support options and security updates ended on January 16...

### *player*

Microsoft International Soccer 2000 is a sports game developed by Rage Software and published by Microsoft. It was released in 1999 for Windows. The player takes the role of manager of an international football team in a competition such as the FIFA World Cup or UEFA European Football Championship. The game was developed in conjunction with several football coaches, and released in the United States for \$20. Reception of the game was generally positive. Its graphics were rated highest, though reviewers also enjoyed the simplicity of play. However, gameplay aspects such as AI earned a mixed response.

Office 2000 family of products and was specifically designed for creating and editing graphics, illustrations, and photo compositions.

PhotoDraw offered a range of features including image editing tools, drawing and painting capabilities, text manipulation, special effects, and the ability to work with layers. It also included templates and clip art to assist users in creating various types of designs, such as flyers, brochures, and web graphics.

Despite its initial popularity, Microsoft PhotoDraw did not receive significant updates or continued development. The last version released was PhotoDraw 2000, which came bundled with Microsoft...

### History of Microsoft Office

*Microsoft Office 2000 Personal was an additional SKU, solely designed for the Japanese market, that included Word 2000, Excel 2000 and Outlook 2000.*

This is a history of the various versions of Microsoft Office, consisting of a bundle of several different applications which changed over time. This table only

includes final releases and not pre-release or beta software. It also does not list the history of the constituent standalone applications which were released much earlier starting with Word in 1983, Excel in 1985, and PowerPoint in 1987.

Microsoft Office, MS Office, or simply Office, is an office suite and family of client software, server software, and services developed by Microsoft. The first version of the Office suite, announced by Bill Gates on August 1, 1988, at COMDEX, contained Microsoft Word, Microsoft Excel, and Microsoft PowerPoint — all three of which remain core products in Office — and over time Office applications have grown substantially closer with shared features such as a common spell checker, Object Linking and Embedding data integration and Visual Basic for Applications scripting language. Microsoft also positions Office as a development platform for line-of-business software under the Office

conglomerate headquartered in Redmond, Washington. Founded in 1975, the company became influential in the rise of personal computers through software like Windows, and the company has since expanded to Internet services, cloud computing, video gaming and other fields. Microsoft is the largest software maker, one of the most valuable public U.S. companies, and one of the most valuable brands globally.

Microsoft was founded by Bill Gates and Paul Allen to develop and sell BASIC interpreters for the Altair 8800. It rose to dominate the personal computer operating system market with MS-DOS in the mid-1980s, followed by Windows. During the 41 years from 1980 to 2021 Microsoft released 9 versions of MS-DOS with a median...

---

It was originally created by Robert Gaskins, Tom Rudkin, and Dennis Austin at a software company named Forethought, Inc. It was released on April 20, 1987, initially for Macintosh computers only. Microsoft acquired PowerPoint for about \$14 million three months after it appeared. This was Microsoft's first significant acquisition, and Microsoft set up a new business unit for PowerPoint in Silicon Valley where Forethought had been located.

PowerPoint became a component of the Microsoft Office suite, first offered in 1989 for Macintosh and in 1990 for Windows, which bundled several Microsoft apps. Beginning with PowerPoint 4.0 (1994), PowerPoint was integrated into Microsoft Office development, and adopted shared common components...

Microsoft SQL Server is a proprietary relational database management system

developed by Microsoft using Structured Query Language (SQL, often pronounced "sequel"). As a database server, it is a software product with the primary function of storing and retrieving data as requested by other software applications—which may run either on the same computer or on another computer across a network (including the Internet). Microsoft markets at least a dozen different editions of Microsoft SQL Server, aimed at different audiences and for workloads ranging from small single-machine applications to large Internet-facing applications with many concurrent users.
