Helping you get started with a problem solving approach to a sick cat. Notes on Feline Internal Medicine 2nd edition is part of a popular series specifically designed, through an accessible note-based style, to ensure veterinarians and students have quick and easy access to comprehensive and practical clinical and diagnostic information. Distinct differences exist between cats and dogs not only in their physiology and metabolism but also in the way disease tends to present. This book is a short 'pocket guide' to feline internal medicine helping you to formulate a diagnostic plan and therapeutic strategy. The focus is on evidence-based medicine where available, otherwise current best practice is presented. The book is divided into four sections:

- Section 1 gives an overview of some key areas of feline medicine including paediatric and geriatric medicine.
- Section 2 focuses on the approach to common presenting signs and differential diagnosis of commonly used haematologic and biochemical parameters.
- Section 3 presents an organ system based approach
- Section 4 covers feline infectious diseases.

A selection of useful texts and websites for further reading are included at the end of the book. **CHANGES FOR THIS EDITION**

- Stronger focus is placed on initial testing for a disease, and what changes might be expected.
- Additional sections have been

added on sedation and anaesthesia, health screening, oncology and emergency and critical care. • More diagrams added to aid understanding. • Care taken to avoid repetition and focus placed on common conditions.

Small Animal Medical Differential Diagnosis

Focusing on 'day one competencies', this book offers essential guidance to the most common problems encountered in small animal general practice. Addressing 100 core scenarios, it is ideal for the undergraduate or newly qualified vet, and for those seeking an up-to-date refresher. Organized by presenting sign (diarrhoea, itching) or disease (diabetes mellitus, pancreatitis), and with colour illustration throughout, each chapter explains: how to make a diagnosis which interventions are most appropriate in general practice what the vet should say to the client before and after examination The authors also offer invaluable advice on other key topics such as annual health checks, neutering and euthanasia, and they tackle the tough questions: What if it doesn't get better? What is the low cost option? When should I refer? Never before has so much practical information been brought together in a single volume. Like having an experienced or specialist clinician standing by your side in the consulting room, 100 Top Consultations will become a trusted companion for students and practitioners alike.
